Part 1: DETERMINE A TOPIC

Topic: English becomes prevalent among Modern Filipino Children

Step 1: Ask a question

- **Question:** What are the common reasons why Filipino Children prefer English Language over Tagalog.
- **Who will Benefit:** Parents will benefit from knowing the reasons why their children struggle and to be aware
- **Analysis:** Descriptive Analysis

Step 2: Determine the Data Needed

a. List of Data elements affecting the topic:

- Perception about english language
- Exposure to Gadgets
- Communication with other children
- Parental Relationship
- Where and how they grow up
- Children's own perception about English Language
- Environment

b. Source related to the elements:

i. Why schools are failing our children (2)

1. Many Filipinos think that a learned person is one who can speak English fluently. This is clearly a residue of our colonial mentality that looks up to a foreign language as superior to Philippine languages.
2. . If English is the language of learning, then we would expect Filipino students who always speak English at home to score higher than those who seldom or never use English as a home language.

ii. Filipino Language in the mouth of Alpha Gen: Mixed Method research

Approach (2024, Charish Mae D. Jubahib , Rammel T. Bayani EdD)

1. The participants are Generation Alpha (born 2010 onwards) who were interviewed for the study.

2. The interviews revealed that most participants are not proficient in Filipino and prefer using English, their first learned language.
3. Many families prioritize English at an early age because it is seen as beneficial for future opportunities.
4. Social media and educational materials are mostly in English, resulting in less exposure to Filipino among children.
5. The widespread use of English in their environment makes Filipino language use a growing challenge for Generation Alpha.
6. Factors such as preference for English, frequent cellphone use, difficulty in Filipino pronunciation, and habitual English use contribute to their struggle with Filipino.
7. Technology promotes English as the primary language, further limiting Filipino language practice.
8. The use of English as the main language of instruction in schools negatively affects students' Filipino language skills.
9. A culture that favors English in formal settings leads to low confidence in using Filipino in academic and professional contexts.

iii. The Impact of English as a Global Language on Filipino Language Practices

1. Language modification refers to how the Filipino language is changing due to the strong influence of English, resulting in some people's loss of proficiency in Filipino.

iv. English in a Post-Pandemic Context: The Case of Multilingual Filipino Day Care Children

1. The study found that 3–4-year-old children in Zamboanga City predominantly used English despite Chabacano instructions, a shift

influenced by increased digital exposure during the pandemic,
demonstrating translanguaging as a key linguistic behavior.

Reflection Questions:

1. Why is it important to identify the question that needs to be answered by the analysis before beginning the project?
 - Identifying the question that needs to be answered is important because it guides the entire analysis and ensures that the project stays focused and relevant. It helps determine what data to collect and what methods to use, preventing wasted time and unclear results.
2. Name some sources of open data for analysis that you found while searching for your data elements.
 - a. ResearchGate
 - b. open-access academic journals
 - c. Inquirer net
